ERIE DIVIDEND NOT IN CASH

DIRECTORS DECIDE TO ISSUE WAR-RANTS FOR THE AMOUNTS.

Romors Had Been Current That the Dividends Would Be Passed -An Easter Way of Securing Money for Improvements -Report for the Year Ended June 30.

The directors of the Eric Railroad met vesterday and declared the regular divilends on the first and second preferred stock, but made them payable in the form of warrants instead of in cash. This was better than had been expected, as it had een rumored beforehand that the dividends on the second preferred would be passed entirely. The interest on the warrants is to be 4 per cent., but their duration and form will be determined later by a special committee after authority for the issue of the warrants is obtained from the Public Service Commission.

It is understood that the declaration of the dividend in this form is according to the policy that stockholders should get dividends whenever earned, and at the same time it gives the road at a rate of interest lower than it could get in the ordinary way a loan of about \$2.500,000, the amount of the two dividends, which it needs

The full dividends of 4 per cent. each were paid on the first preferred stock in 1904.

1905 and 1906 and on the second preferred stock in 1906.

stock in 1906.

At the meeting the earnings of the road for the year ended June 30 were made public. The figures are as follows: Gross earnings, \$53,914,827, an increase of \$3,912,-192; operating expenses, \$38,167,039, an increase of \$2,294,202; net earnings, \$15,747,788, an increase of \$1,617,990; total net income, \$16,22,810, an increase of \$1 555,711; amount expended for improvements and additions, \$1,642,028, and increase of \$284,944; balance available for dividends, \$4,261,629; surplus after payment of dividends amounting to

available for dividends, \$4,261,629; surplus after payment of dividends amounting to \$2,555,696, \$1,705,933, an increase of \$1,171,958.

The official statement of the dividend action follows:

"Out of the surplus net earnings for the fiscal year ending June 30, 1907, the Erie directors to-day declared a second dividend of 2 per cent. upon the first preferred stock and also a dividend for that fiscal year of 4 per cent. upon the second preferred stock, payable in two semi-annual instalments. 4 per cent. upon the second preferred stock, payable in two semi-annual instalments, each of 2 per cent. The dividend on the first preferred stock is payable October 1, 1917, to stockholders of record September 17, 1907, and the dividend on the second preferred stock is payable Nov. 1, 1917, 2 per cent. to stockholders of record October 10, 1907, and 2 per cent. to stockholders of record April 10, 1908. The directors further resolved that dividend warrants should be issued evidencing the right of the several holders of the first preferred and second preferred stock to receive dividends as above declared. Application will at once be made to the Public Service Commission for leave to issue dividend warrants bearing interest at the rate of 4 per cent.per annum, such warrants to be issued to stockholders such warrants to be issued to stockholders of record entitled thereto as above as soon as the necessary authority can be obtained."

IRON CONSUMPTION HEAVY. "Iron Age" Says That Chief Difficulty Is

The Irou Age says:

The principal anxiety of producers of fron and steel is that of collections, and these appear to be the more satisfactory the closer the buyer is to the railroad interests. The financial situation is dominating the industry, yet there are surprisingly few canns and deliveries of material are taken right along, and many cases of urging shipstill very heavy and promises to continue branches of the trade which have enjoyed the greatest advances there is a deadlock etween buyers and sellers over prices for future delivery and the markets are de-

The great majority of sellers are not forcing the market, for instance, in foundry pig iron, but there are a sufficient number, is little doubt that \$19 for No. 2 foundry at Lehigh Valley furnaces would be accepted for good sized lots to satisfactory customers. This has attracted some little buying and has brought out some fair inquiries.

A somewhat significant transaction is reported in the steel trade. A leading in-terest has just bought 5,000 tons of billets abroad for importation to be rolled into ex-port products, and thus admit of securing the drawback of 90 per cent. of the duty

CLEVELAND, Aug. 27.—The Iron Trade Review to-morrow will say:

All centres report a further weakening of prices, and the midsummer lull has only been broken by purchases of a few odd lots to cover consumers' immediate needs. Southern iron No. 2 has declined to \$18.50 Birmingham for delivery the remainder of the year, and one producer has named \$17 for the first six months of 1908. The purchase of 6,000 tons of bessemer by the Jones & Laughlin Steel Company at \$22 Valley for September shipment records a decline of 50 cents on this grade. Structural material requirements are beavy, and large projects are being undertaken notwithstanding the stringency of the money market. Rail reservations made by several of the leading trunk lines for 1908 aggregate nearly 300,000 tons. The Baltimore and Ohio has asked for 75,000 tons pending an adjustment of rail specifications which will be made early in September.

INTER-MET DIRECTORS MEET. No Action on Dividend -- Denial of Receiver-

The directors of the Interborough-Metro-The directors of the Interborough-Metropolitan Company met yesterday, but took no action on the dividend question. The only matters outside of regular routine work which were considered were, it was announced, reports of the earnings of the operating companies of the system for the quarter ended June 30.

When August Belmont was asked about the rumors that some of the subsidiary companies, and especially the New York City Railway, which leases the Metropolitan Street Railway, were to pass into the hand of a receiver he said:

"There is not a single word of truth in any of the rumors."

A petition in bankruptcy has been filed against Louis Meryash, real estate operator and builder of 73 West 118th street, by Stern, Singer & Barr for these creditors: Joseph Watnik, \$1,300; Malbin & Kammerman, \$500. and Maurice Newmark, \$300. Judge Holt of the United States District Court appointed Joseph A. Goulden receiver, bond \$10,000. It was stated that he has mortgaged several parcels of real estate to his wife, Rebecca, notes had gone to protest, several executions had been given to the Sheriff and there are perhaps twenty suits pending against him. He owns a flat house at 73 West 118th street, of which the rents are estimated at \$5,000 a month. Mr. Meryash has been a large operator on the upper West Side and in July last filed plans for two six story flats, to cost \$110,000, on Manhattan

story flats, to cost \$110,000, on Manhattan street near Broadway.

Judge Holt of the United States District Court has appointed John Ewen receiver in bankruptcy for the Smith & Kerrissey Co., restaurant at 108-110 West Thirty-eighth street, with a bond of \$1,000, and empowered into continue the business for thirty days. It was said that if the business is continued and the good will preserved it is likely a purchaser may be obtained. The net value of the assets above incumbrances does not exceed \$2,000, besides the lease of the premises. Charles A. Cowen & Co., the landlords, on August 21 brought dispossess proceedings for non-payment of rent, taxes and water rates, which aggregate \$9,000.

Judge Holt of the United States District four has appointed Charles L. Cohn receiver in bankruptcy for H. J. Hearn & Co., dealers in cloaks and suits, at 234 Fifth avenue and at Atlantic City, N. J., with a bond of \$10,000. Assets are estimated at \$20,000 on stock and fixtures and \$2,000 outstanding acceptable.

GOSSIP OF WALL STREET.

Prior to yesterday's opening the twenty active railroad stocks had advanced about \$1.50 a share from the low average of the year shown in Saturday's close. The rally was not great enough to discourage most of the outstanding shorts nor did it appear to them substantial. On Tuesday after-noon particularly there were evidences of weakness and many traders were encourage to enlarge commitments on the short side in the early trading yesterday. The result was disappointing, for the market broadened out and gained greater strength as the session advanced, and though dull in the last hour, while traders were waiting for the result of the Eric meeting, closed at close to the top prices of the day. In range and sustained strength and in the display of buying power even for specialties the market was

The gain was particularly encouraging for the reason that it brought out no re-newal of liquidation and thus apparently furnished emphatic denial of the failure rumors current in the previous days of the week. Bears had predicted that any fair advance in prices would bring out stock in large quantities from houses alleged to have been crippled. There was nothing at all in the trading to make good this prediction.

In many of the active stocks, no doubt, the advance was to a considerable extent a drive on the shorts, but in many of the generally inactive stocks and specialties the advance was greater than in the average of the active speculative shares. It is not to be expected that there was any short interest to work against in these specialties. It was strong and well sustained buying power that moved them up. In some of them the gains were as great as the losses on any day of the decline. In fact that was taken as confirming the im-pression that the liquidation was over.

trading, for it was known that the Erie direc tors went into session at 2 o'clock, and it was expected that an announcement regarding action on the first and second preferred dividends would be made soon thereafter. The announcement was not made until a few minutes before the close of the market, and meanwhile the trading lagged with interest entirely concentrated on the action of the Eric directors. As far as could be noted from the few transactions after the announce-ment of the dividends they were regarded as In the whole session there was no transaction in the second preferred, but the first advanced sharply just before the close from 47% to 48. The closing price was a net gain of points on the day

Comments on the action of the Erie directors were generally favorable. There was naturally some grumbling because of the failure to pay dividends in cash in the face of report showing a surplus after all charges and dividends of \$1,706,000, an increase of \$1,172,000 over the surplus in the preceding year. The showing was better than the Street had expected in view of the repeated rumors of discontinuance of the dividends. But it was realized that the road needed large amounts for improvements and had been in even greater difficulties than most of the roads in efforts to raise money. Money for capital expenditure, it was well known could only be raised by the payment of very high rates of interest. Conservative stock holders accordingly considered it preferable for the stability of their investment that the company retain the \$2,500,000, the amount of year's dividend payments, and leave to the future financing to equalize the expense of

It seems to be generally understood that there is a large short interest in Delaware and Hudson, and an advance of 4 points in the stock on sales of only 235 shares was taken as indicating that shorts might have considerable difficulty in covering. The stock latterly has seemed to yield easily to pressure, but yesterday it opened a full three points above Tuesday's closing prices. At no time during the session was it possible for a short to cover at better than 150, which was the

There was another special engagement of ron, but there are a sufficient number, gold for Berlin. The amount was \$500,000, cularly in the territory east of the Allowed by others. It was also announced that yesterday and on previous days of the week shipments had been made to Canada in the aggregate amount of \$750,000. Apart from these shipments developments from the other side were of a reassuring nature. From London, where there has been increasing ease sent over many buying orders. The orders were well distributed over the international list, but were especially effective in the Hill stocks. Great Northern closed with a net gain of 21/2 points, and Northern Pacific scored a gain of 214.

On a report that a further distribution or the Great Northern ore certificates would be made this year, the certificates sold up to 52 at the close, a gain of 4% points. The new dis-tribution, it was said, would be at the rate of for the year.

Not even in the local traction shares was a new low record made for the year. On the other hand all these stocks showed unexpected resiliency. Inter-Met preferred sold up to and closed at 26, a gain of 3% points, and there was even a gain of % of a point in the common. Manhattan closed 51/4 points up, at 1181/4. Metropolitan and Third Avenue gained 2 and 2% points respectively. The gains were accompanied by no news of any change in the Inter-Met situation or in the circumstances of the subsidiary companies. Very likely, it was said in some quarters, the advances show that the liquidation induced by necessity or alarm is over and that some people are willing to take a chance on local tractions at the low prices.

A gain of 5 points in United States Reduction and Refining preferred and 5½ points in International Pump preferred were en-couraging to holders of generally inactive

Reports that the Secretary of the Treasury intended to deposit large amounts weekly in the New York banks lacked confirmation. From Washington it was announced that no report of the amount of the deposits or the localities would be officially made the Secretary in his announcement last week deposits in localities where they were mos needed, and the impression grew that sub-stantial amounts would be placed in New York banks in the near future. The feeling over the money situation accordingly became

a bit better.

The Metal Market. The copper market in New York yesterday remained dull and unchanged. In London the market reacted from yesterday's advance, spot declining 1 to £79, and futures declining the same amount to £77 15s. Tin in New Yor was 20 points lower at 37.15@37.60, and in Lon don was 1 higher at £169 15s. for spot and £169 10s. for futures. Lead was unchanged both tion being £19. Spelter in London was 21/2 points lower and in New York was unchanged at 5.55@5.65. The local iron market was un-changed. The London market was higher, with standard foundry at 56s. and Cleveland

warrants at 57s. To Remodel the Old Pro-Cathedral.

Plans have been filed with Building Superintendent Murphy for remodelling into an industrial school with a chapel the two an industrial school with a chapel the two story and basement Gothic building at 13° Stg.iton street, which formerly was the Episcopal Pro-Cathedral. It will have a gymnasium and billiard room and a bowla gymnasium and billiard room and a bowling alley in the basement and a nursery on the second story, above the school and chapel. The improvements are to be made for the New York Protestant Episcoral City Mission as owner at a cost of \$25,000, according to the estimate of the architects Hoppin, Koen & Huntington. The building will be known as the Epiphany Chapel School.

ORDERS TO IMPROVE TRANSIT. Public Service Commission to Act on Prob-

tem in a Day or So. The Inter-Met has refused to grant the informal request made by the Public Service Commission for an opportunity to examine the books of the company, and to-day the commission, after meeting as a committee of the whole, will issue a peremptory order for the production of the books. This order it is known will not be complied with, on the ground that the board has no jurisdiction over a holding company, such as the Inter-Met is, and the question then will be carried to the courts. But while these proceedings may delay the resumption of the commission's inquiry into the condition of the local railroads they will not prevent the board ordering an improved service on the subway. elevated and surface lines.

The members of the board were in conference nearly four hours yesterday with William M. Ivins, the special counsel to the commission, and another conference is to be held to-day. While Mr. Ivins and Chairman Willcox would answer no questions as to the matters which had been that important orders affecting the operation of the lines of this city might be looked for either this evening or to-morrow It is the opinion of the commission that enough evidence has already beer brought out in the investigation to prove that none of the roads controlled by the Inter-Met is operated up to its fullest capacity even in the rush hours. It is the intention of the commission to direct the putting into effect of better running services immediately.

The commissioners have resolved that there is no need to wait for the end of the

there is no need to wait for the end of the investigation before ordering improvements in the travelling facilities of the Inter-Met's lines and intend to take action at once. It can be stated that the members of the board realize that during rush hours there must of necessity be straphangers in the cars and trains, but they will see to it that in the other hours of the day and night there is a sufficient service provided to give passengers a reasonable chance of getting a seat.

An order was issued by the commission last week directing the Brooklyn Rapid Transit Company to complete the laying of the tracks on the Livingston street and Lafayette avenue trolley exetnsions by September 15. President Winter in a letter sent to the board yesterday said that while he was using every effort to finish the work by the date fixed by the commission he was afraid he could not have the extensions in operation before fifteen or twenty days after that date. Because of the assurance given by Mr. Winter that the work is being pushed as rapidly as possible it is likely that the commission will agree to a modification of its first order. cation of its first order.

INDICTED AS BUCKET SHOPS.

Five Brokers Whose Places Were Raided Named by Washington Grand Jury. Washington, Aug. 28.-The Grand Jury to-day reported indictments against five alleged bucket shop brokers whose places of business were raided several days ago by the police acting under instructions from the United States District Attorney from the United States District Attorney.
The persons named are Thornton Cheeley and T. Prowning Spence of the firm of theeley & Spence; Frank Kane, and Percy Wade and Jesse H. Hedges of the firm of Wade & Wedges.

The indictments charged fitting up and keeping a place "for the purpose of gaming."
The District code, which prohibits gaming, prescribes a maximum penitentiary sentence of five years.

Another Gold Engagement.

Another engagement of \$500,000 of gold was made yesterday by Muller, Schall & Co. to go to Germany, making the total amount shipped by this firm in the last ten days \$2,100.000. The quotations of foreign exchange were lower than the export point under a special arrangement with German bankers. The New York agency of the Bank of Montreal has shipped \$750,000 of gold to Canada in the last three days, in-

BUSINESS OPPORTUNITIES. BUSINESS MAN OF 39 WILL ASSOCIATE WITH YOUNGER COLLEGE BRED MAN WITH LIMITED CAPITAL, IN COFFEE TRADE. ADDRESS GOOD PROSPECTS, BOX 109 SUN OFFICE.

AS TO THE SOUTHERN'S SERVICE. Slow Improvement Traceable to Hostile

Legislation, Explains Comptroller Plant. WASHINGTON, Aug. 28.-The cross-examination of Comptroller Plant of the Southern Railway was continued to-day by ex-Representative Woodward, who asked a series of questions at the hearing of the North Carolina rate case designed to show that the operating ratio on intrastate business in North Carolina was lower than had been testified to by Mr. Plant in his direct testimony, and that consequently net earnings were higher.

At the afternoon session Mr. Plant was questioned as to the gross and net earnings of the Southern Railway system since 1900. He showed that while the gross earnings increased from \$53,641,438.67 in 1906 to \$56,657,994.39 in 1907 there had been decrease in net earnings amounting to \$1,909,587.46. He testified that this was largely due to increases in the cost of labor

and material.

Speaker Justice, of counsel for the State, asked why the Southern's facilities were not increased faster. Mr. Plant replied that it took money to pay for them; that the Southern Railway did not have sufficient cash and must go into the markets to borger the morey and that it could not find cash and must go into the could not find a market for its securities in the face of local State legislation pulling down its

local State legislation pulling down its earnings.

Mr. Justice asked how much money had been taken out of the treasury in April for the payment of dividends, when money was needed for increased facilities. Mr. Plant replied that the April dividend amounted to \$1,500,000.

Mr. Plant testified that the congestion had been somewhat relieved in the last six months and said he did not attribute the congestion in North Carolina to rate legislation. On the contrary, he was afraid that rate legislation would tend to decrease business as a whole; the greater the agitation against railways the greater the danger of a decrease in business.

Mr. Plant said that, speaking personally, he believed there should be a mutual understanding between the railway and the public when there was a disagreement on rates; that the proper way was to get together and talk it out.

Binghamtonites Get Million Dollar Forest Lands.

BINGRAMTON, Aug. 28.-The suit of Fireman Cuderkirk and Charles E. Snyder of Herkimer against the Bayless Pulp and of Herkimer against the bayiess rule and Paper Company of this city, involving the legality of the sale to the local firm of a tract of several thousand acres of virgin forest on the Ste. Anne River near Quebec, valued at \$1.00,000, was to-day decided by Former Justice John M. Davy of Rochester as referee in favor of the Bayless company.
